DETAILED ACTION

1. According to paper filed on Dec. 17, 2005, the applicants have amended claim 88.

The applicants have also submitted a new abstract.

2. Claims 1-105 are pending in the application.

Response to Arguments

3. Applicant's arguments filed on Dec. 17, 2004 have been fully considered but they are not persuasive. The applicants have submitted a new abstract. However, this abstract is still too long. It should be only one page. In regard to indefiniteness rejections, the applicants have amended claim 88 to overcome this particular rejection. The examiner agrees with the applicants arguments that point of attachment of metal to chromogen moieties is definite. However, the examiner does not agree with the applicants arguments regarding rest of indefiniteness rejections. The applicants argue that there is no need to define some terms in the claims since they are already defined in the specification. What is the need for claims since every thing is defined in the specification. It is the claim language which is critical and therefore, has to be definite.

Conclusion

4. rejection of claims 1-105 under 35 U.S.C. 112, second paragraph is maintained for the reasons of record.

5. The abstract is objected since it is too long.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
